PROFESSIONAL SUMMARY

Computer Science graduate with a strong foundation in Java, Spring Boot, Hibernate, and MySQL, built through academic and personal projects. Skilled in object-oriented programming, developing RESTful APIs, and designing database-driven applications. Seeking an entry-level Java Developer role to contribute to scalable backend solutions, write clean and maintainable code, and grow within a collaborative engineering team

TECHNICAL SKILLS

- Programming Languages: Java, SQL, JavaScript , Python
- Frameworks: Spring Boot, Hibernate,SpringData Jpa, React
- Web Technologies: HTML, CSS, Bootstrap
- Databases: MySQL
- Tools & Concepts: Postman,Git,Github, MVC Design Pattern ,Data Structures

INTERNSHIP EXPERIENCE

Java Development Intern, Anudip Foundation Jun 2026 - Oct 2026

- Contributed to backend development of a web application using Java, Spring Boot, Hibernate, and MySQL, building RESTful APIs and implementing CRUD operations while following clean coding practices.
- Collaborated with a team in a corporate environment, adapting quickly to new tools and requirements, and supported project execution aligned with company objectives.

Web Development Intern,TriosTechnologies Jul 2024 - Aug 2024

- I have contributed to a web development project during the internship, gaining hands-on experience in collaborative, corporate-driven initiatives , adaptable and quick to learn, supported project execution aligned with company objectives.

PROJECTS

Smart Dairy Distribution and Subscription Management System(Backend)

Java | Spring Boot | Spring Data JPA | Spring Security | Hibernate | MySQL | REST APIs

- Developed RESTful APIs using Java and Spring Boot to manage customer records, product details, milk quantities, and subscription plans, implementing complete CRUD operations.
- Designed and integrated a MySQL database using Spring Data JPA and Hibernate for efficient storage and retrieval of customer, subscription, and delivery data.
- Built a layered architecture (Controller, Service, Repository) to keep the backend clean, maintainable, and scalable.
- Automated daily milk delivery tracking and subscription period management, reducing manual record-keeping and improving accuracy in dairy operations.

Course Registration System(Fullstack)

Java | Spring Boot | Spring Data JPA | MySQL | REST APIs | HTML | CSS | JavaScript

- Implemented APIs to register users, retrieve the user list, and fetch the list of available courses.
- Designed and integrated a MySQL database using Spring Data JPA for efficient data storage and retrieval.
- Applied layered architecture (Controller, Service, Repository) to build a maintainable and scalable backend application.

EDUCATION

Bachelor of Engineering, Computer Science 2021 - 2025

- GPA: 7.41 / 10

Higher Secondary Certificate (HSC) 2020 - 2021

- Percentage: 84%

Secondary School Leaving Certificate (SSLC) 2018 - 2019

- Percentage: 79%
